## 1. Qualitative Information on Quarterly Consolidated Financial Performance

### (1) Explanation of Results of Operations

During the first nine months of the fiscal year ending March 31, 2018, the Japanese economy recovered at a slow pace with the support of continuing growth in corporate earnings, improvements in jobs and personal income, and other signs of the emergence of a favorable economic cycle. IT investments, which have a significant effect on the operations of the COMTURE Group, are vital for companies to become more competitive in the Digital Transformation Era, for becoming more efficient by altering how people do their jobs, and for automating various tasks. As a result, there is growth in the IT sector, particularly in the cloud services and data analytics categories. The third platform market, which is a new market that covers cloud services, big data, the Internet of things and other components, is expected to expand significantly to annual sales of about 14 trillion yen in 2020 (according to "Japan Third Platform Market Forecast Update by Vertical Market and Company Size" by IDC Japan, a company specializing in IT industry surveys).

Due to numerous activities for expansion of the cloud and big data business throughout the COMTURE Group, there was growth in all four business units: Groupware Solutions, ERP Solutions, Web Solutions and Network Services. Furthermore, there was a big contribution to growth from many initiatives to make artificial intelligence, the Internet of things, robotic process automation and other new technologies and fields additional drivers of growth. Focusing on transforming needs into solutions is playing a central role in our growth. People who interact with customers carefully listen to their demands and interests. Then we use our expertise to respond to our customers' needs with new services and other ideas. A relentless commitment to adding more value, improving productivity and supplying outstanding quality also define our operations.

In the first nine months, the COMTURE Group performed as follows.

Net sales: 12,116 million yen (up 22.4% year-on-year)

Operating profit: 1,383 million yen (up 51.3% year-on-year)

Ordinary profit: 1,406 million yen (up 50.0% year-on-year)

Profit attributable to owners of parent: 1,039 million yen (up 64.2% year-on-year)

Sales in the first nine months were higher than one year earlier for the eighth consecutive year and reached an all-time high. There were several reasons for this accomplishment: higher sales from the cloud and big data business as its market expands rapidly; and many initiatives targeting artificial intelligence, robotic process automation and other new technologies. Earnings were higher because of higher sales per employee, the result of the constant implementation of our added-value strategy, the larger scale of business operations, and the elimination of unprofitable activities due to the rigorous oversight of processes used for estimates and project management. The benefits of these items more than offset growth in personnel expenses and the increase in selling, general and administrative expenses resulting from the addition of consolidated subsidiaries. As a result, profit attributable to owners of parent was higher than one year earlier for the sixth consecutive year and reached an all-time high.

Business segment performance was as follows.

### 1) Solution Services

There was growth in the cloud and big data business as the cloud market continues to expand and new types of customer needs involving artificial intelligence, robotic process automation and other fields emerge. As a result, sales increased 15.9% year-on-year to 7,945 million yen and operating profit increased 40.2% to 848 million yen.

#### 2) Product Sales

Sales of Salesforce.com licenses continued to increase along with growth of the cloud business. As a result, sales increased 1.8% year-on-year to 116 million yen and operating profit increased 56.0% to 66 million yen.

### 3) Network Services

The performance of this segment was strong because of numerous measures for adding more value to platform solutions for customers' transitions to the cloud, remote surveillance and other activities. In addition, a subsidiary newly consolidated in the third quarter of the previous fiscal year made a big contribution to segment sales growth. As a result, sales increased 36.4% year-on-year to 4,260 million yen and operating profit increased 76.2% to 470 million yen.

#### (2) Explanation of Financial Position

Total assets were 8,060 million yen at the end of the third quarter, 775 million yen more than the end of the previous fiscal year. This was attributable mainly to increases of 967 million yen in cash and deposits and 355 million yen in notes and accounts receivable-trade, while there was decrease of 460 million yen in goodwill.

Liabilities increased 39 million yen to 3,441 million yen. The main reasons were increases of 195 million yen in accounts payable-trade and 188 million yen in current and non-current other liabilities, while there were decreases of 204 million yen in the current portion of long-term loans payable and 98 million yen in accrued expenses.

Net assets increased 735 million yen to 4,619 million yen mainly because profit attributable to owners of parent in the first nine months was more than dividend payments.

## (3) Explanation of Consolidated Forecast and Other Forward-looking Statements

At this point, there are no revisions to the full-year consolidated earnings forecast for the fiscal year ending March 31, 2018 that was announced in the "Summary of Consolidated Financial Results for the Fiscal Year Ended March 31, 2017 (Japanese GAAP)" on May 1, 2017.

The above forecasts are based on judgments made in accordance with information available to management at the time this report was prepared. Actual results may differ substantially from these forecasts for a number of reasons.
